Clearing a pathway for
Work Integrated Learning

© 2008 - 2015

Application of knowledge is
more important than the qualification.

© 2008 - 2015

CareerLounge has deployed these insights
in the products and services we offer.

Our Partners

What We Hope To Achieve In 2016:

- Work closely with our Partners to help identify Paddl job types and relevant employment opportunities for enrolled students.

- Work with peak bodies and membership organisations to map employers by location in relevance to education institutions.

- Help students identify and network with employers of choice.

- Create a pipeline for our education Partners, of employers willing to create work integrated learning opportunities and full time positions for their graduates.

- Convince employers that any student with a minimum of [50] Paddl hours is an ideal candidate for WIL projects, placements internships and ultimately graduate employment !
