Deans of Science meeting

The Challenges facing the HE sector in the next decade and the implications for science teaching and research.

Aidan Byrne
30 Oct 2018

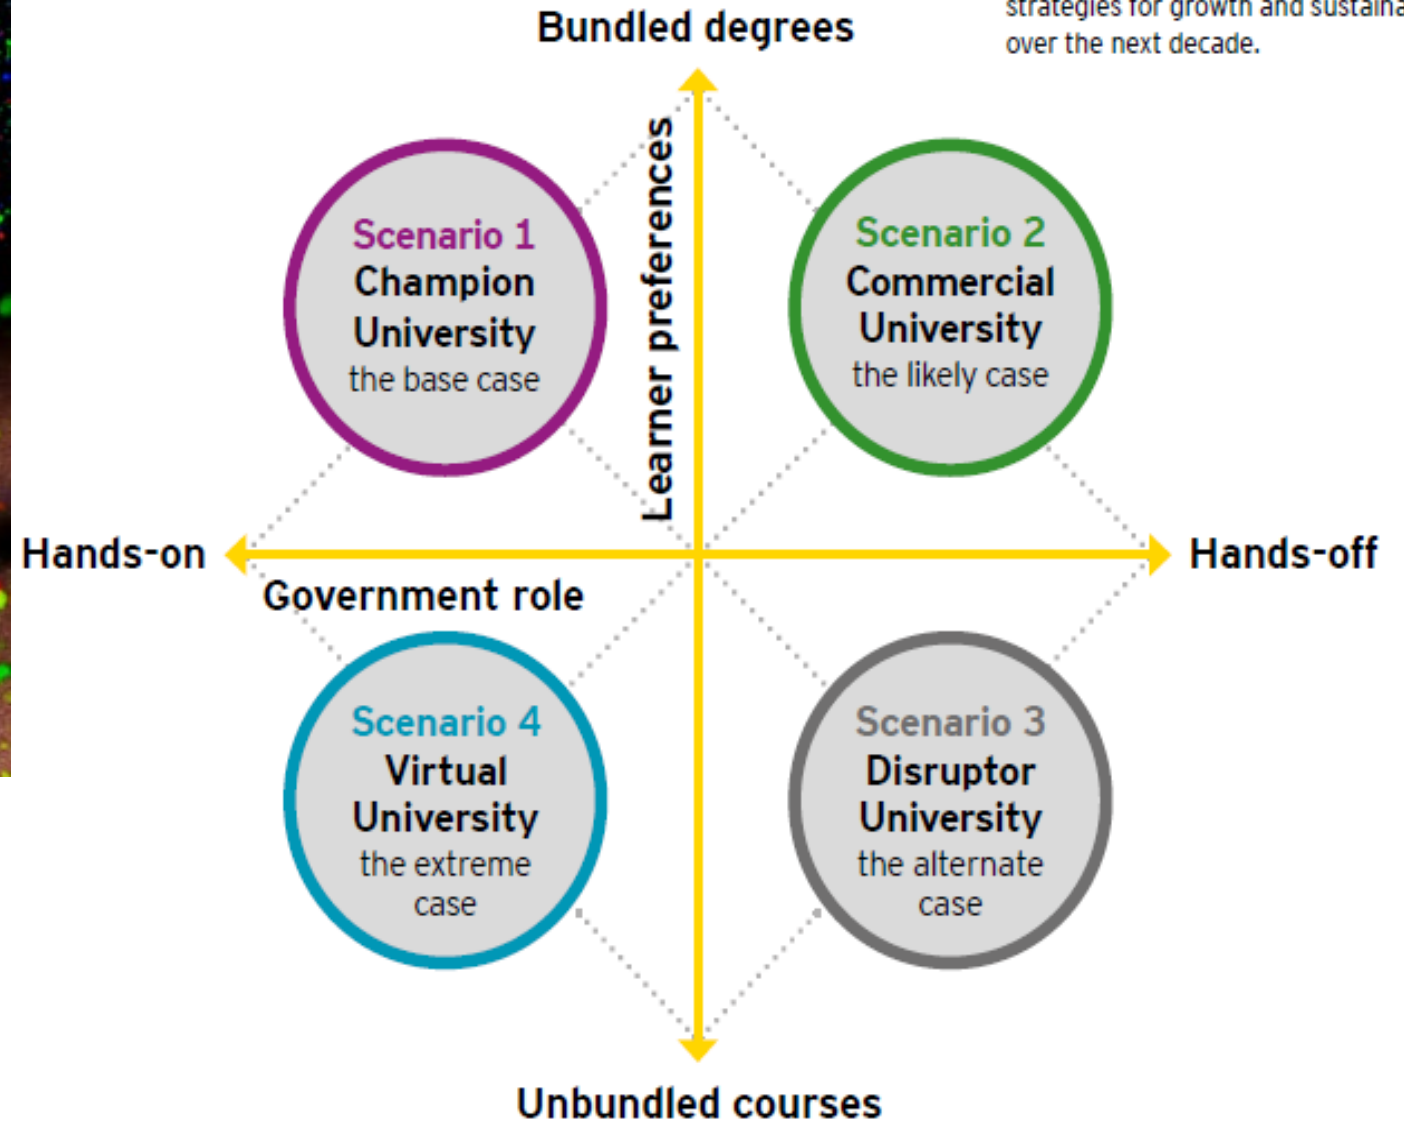

Challenges

- Sector profile
- Near Term Challenges:
 - Exposure to International student volatility
 - Big Data/Big Publishers
 - Federal government disengagement
 - Support for science
- Longer term Threats:
 - What is the relevance of a University in 2030?

Can the universities of today lead learning for tomorrow?

The University of the Future

strategies for growth and sustainability over the next decade.

University Budget model (Research Intensive)

Challenges 2.018

- Sector profile
- Near Term Challenges:
 - Exposure to International student volatility
 - Big Data/Big Publishers (Govt confusion !!)
 - Federal government disengagement
 - Support for science
- Longer term Threats:
 - What is the relevance of a University in 2030?

- Covid
- Covid19
- COVID

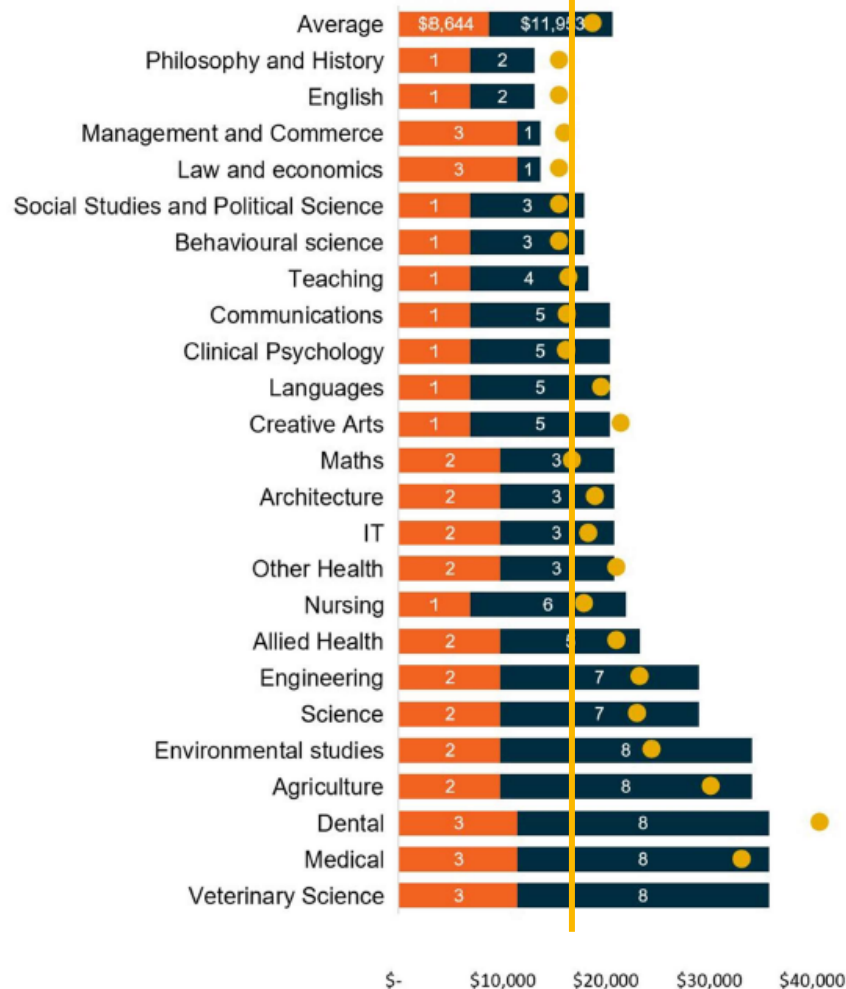

Commonwealth Grant Scheme Reforms

- Funding envelope remains **capped**. No longer able to respond with full flexibility to student demand.
- Students to pay 48% on average up from 42% (but varies significantly by discipline)
- Total revenue per student reduced to **align with cost of teaching**, reducing margin available to cover research.
- Greater flexibility to use funding for Post Grad programs.

Job Ready Graduates

Current Model

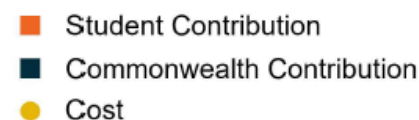

New Model

Used industry
provided “cost of
teaching data”

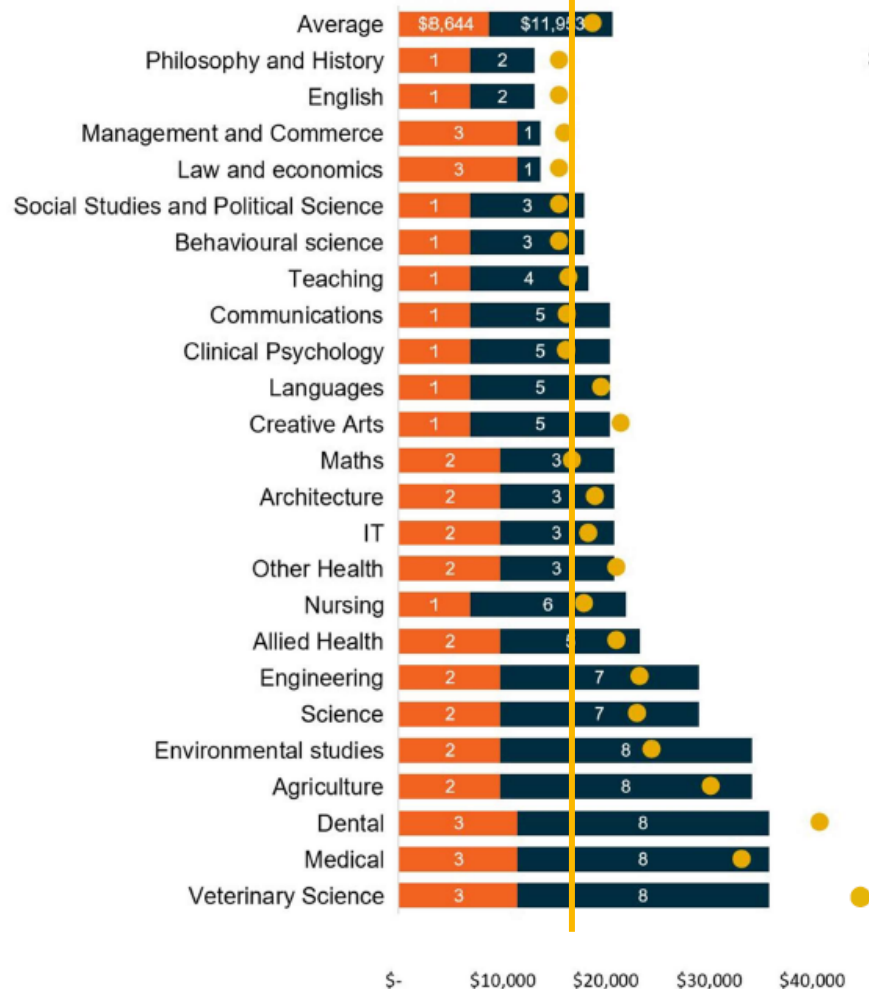

Principle:

Total CSP Revenue
per EFTSL reduced
so it's closer to the
costs of teaching

VET

Job Ready Graduates

Impact of Job Ready Graduates on UQ's Funding per EFTSL

At UQ, the funding per EFTSL will drop approx. 6%.

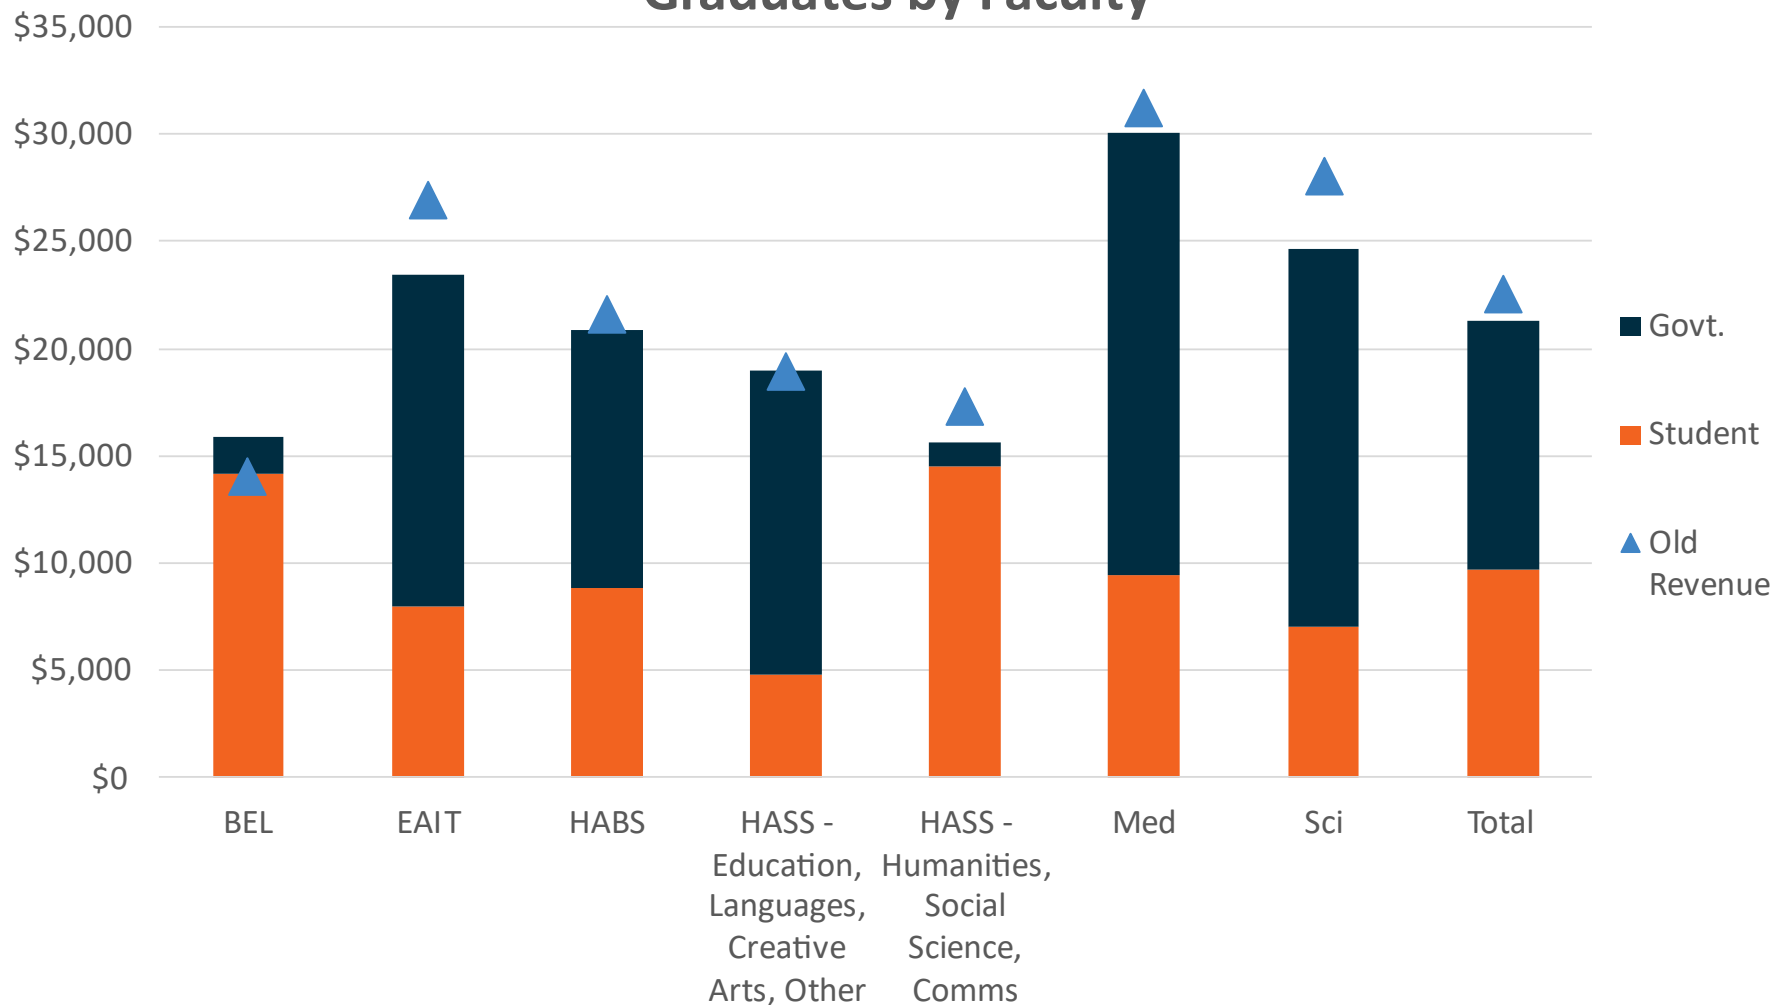

On average, students will pay 2% more and govt will pay 11% less per EFTSL.

Our funding envelope was been reset down accordingly with a small increase of 1.6% by 2024 added for extra places

Based on UQ's discipline mix in 2021

Job Ready Graduates

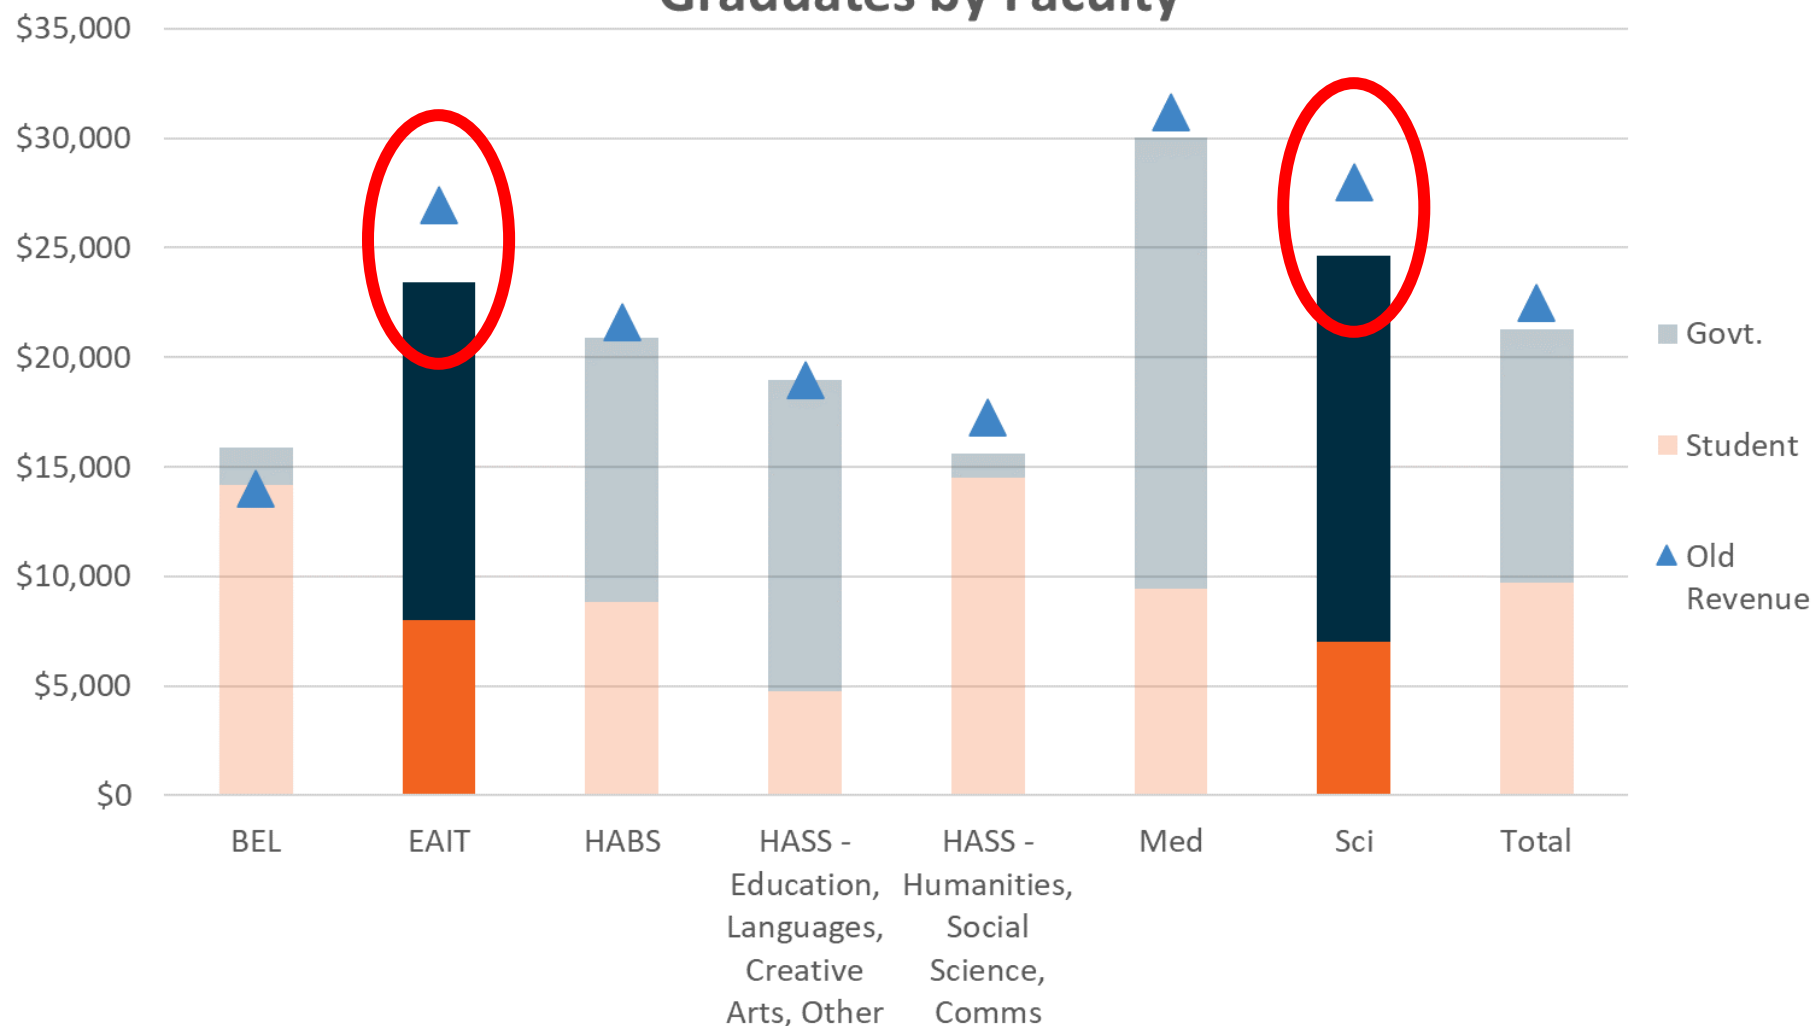

Student vs Cwlth Revenue per EFTSL under Job Ready
Graduates by Faculty

Radical discipline
variance!

Job Ready Graduates

Student vs Cwltb Revenue per EFTSL under Job Ready Graduates by Faculty

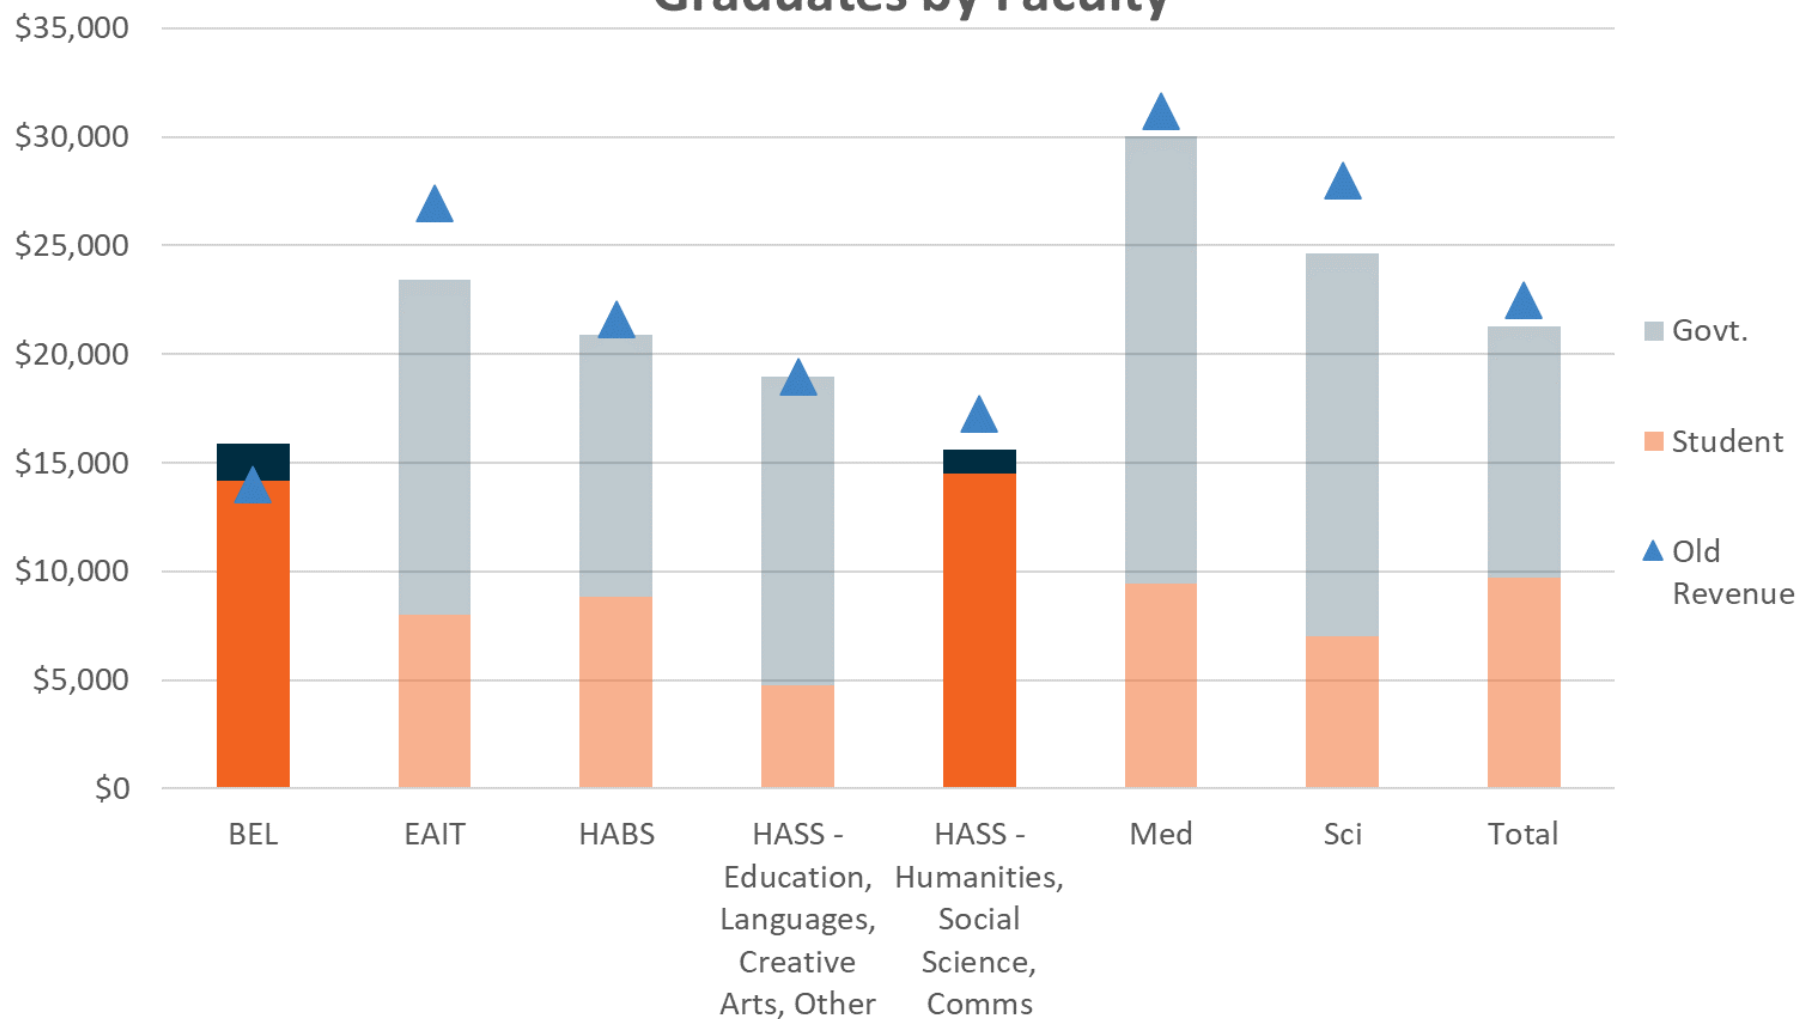

Science and Engineering most affected

-14%

Job Ready Graduates

Student vs Cwlth Revenue per EFTSL under Job Ready Graduates by Faculty

Significant change
in student
contribution.

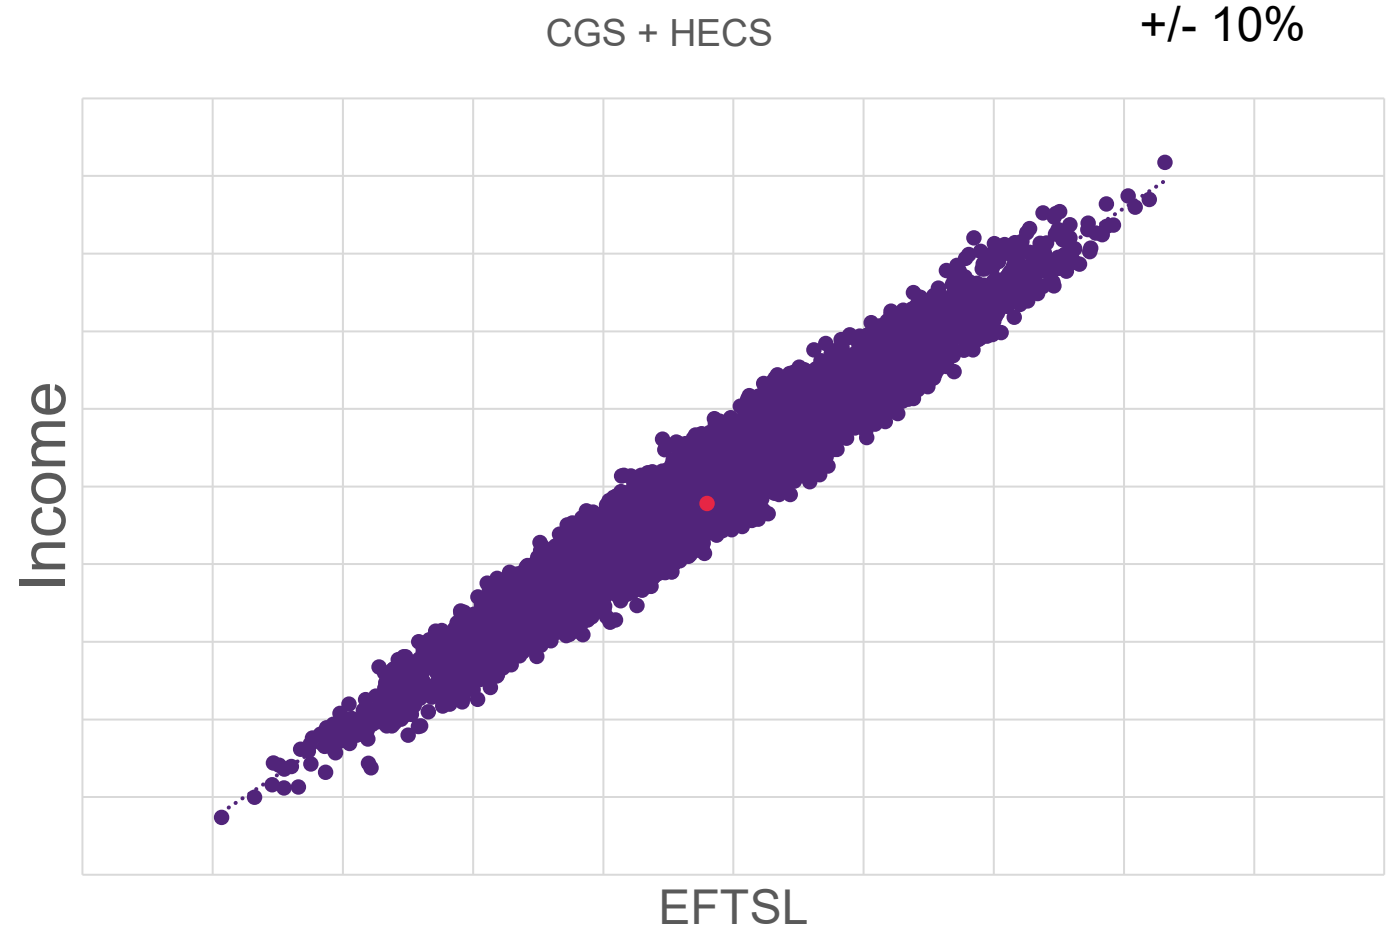

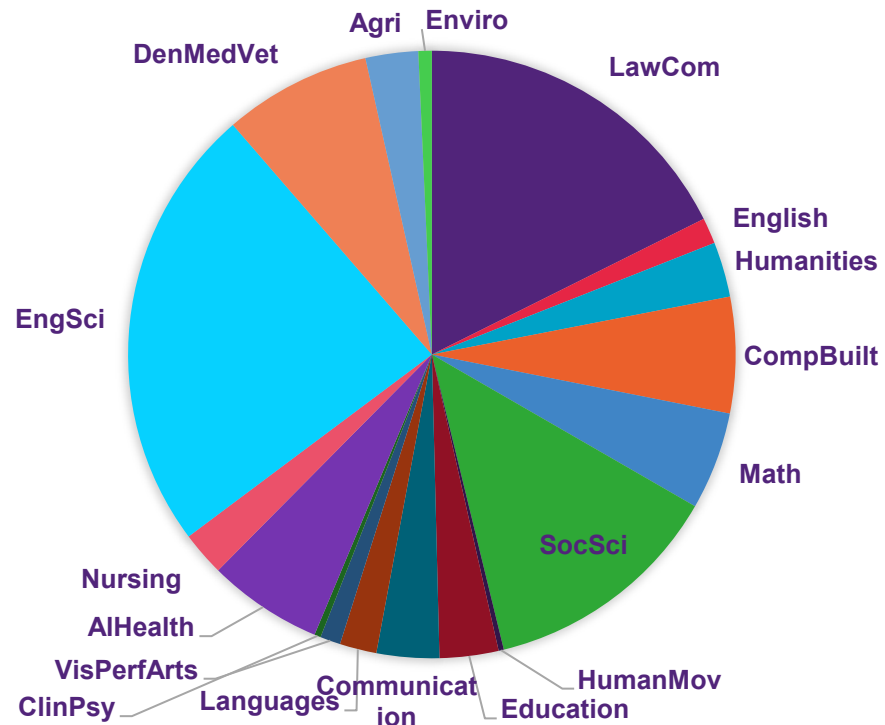

Will HECS
determine student
choice?

Two state
solution
(obvious)

- Our international student market lacks diversity.
- How do we reduce our reliance on a single source market?

When the budget was prepared for 2021 it was expected that borders would start to re-open this year and international students would return to pre-pandemic levels

Continued border closures through until end of 2022 give revenue reduction

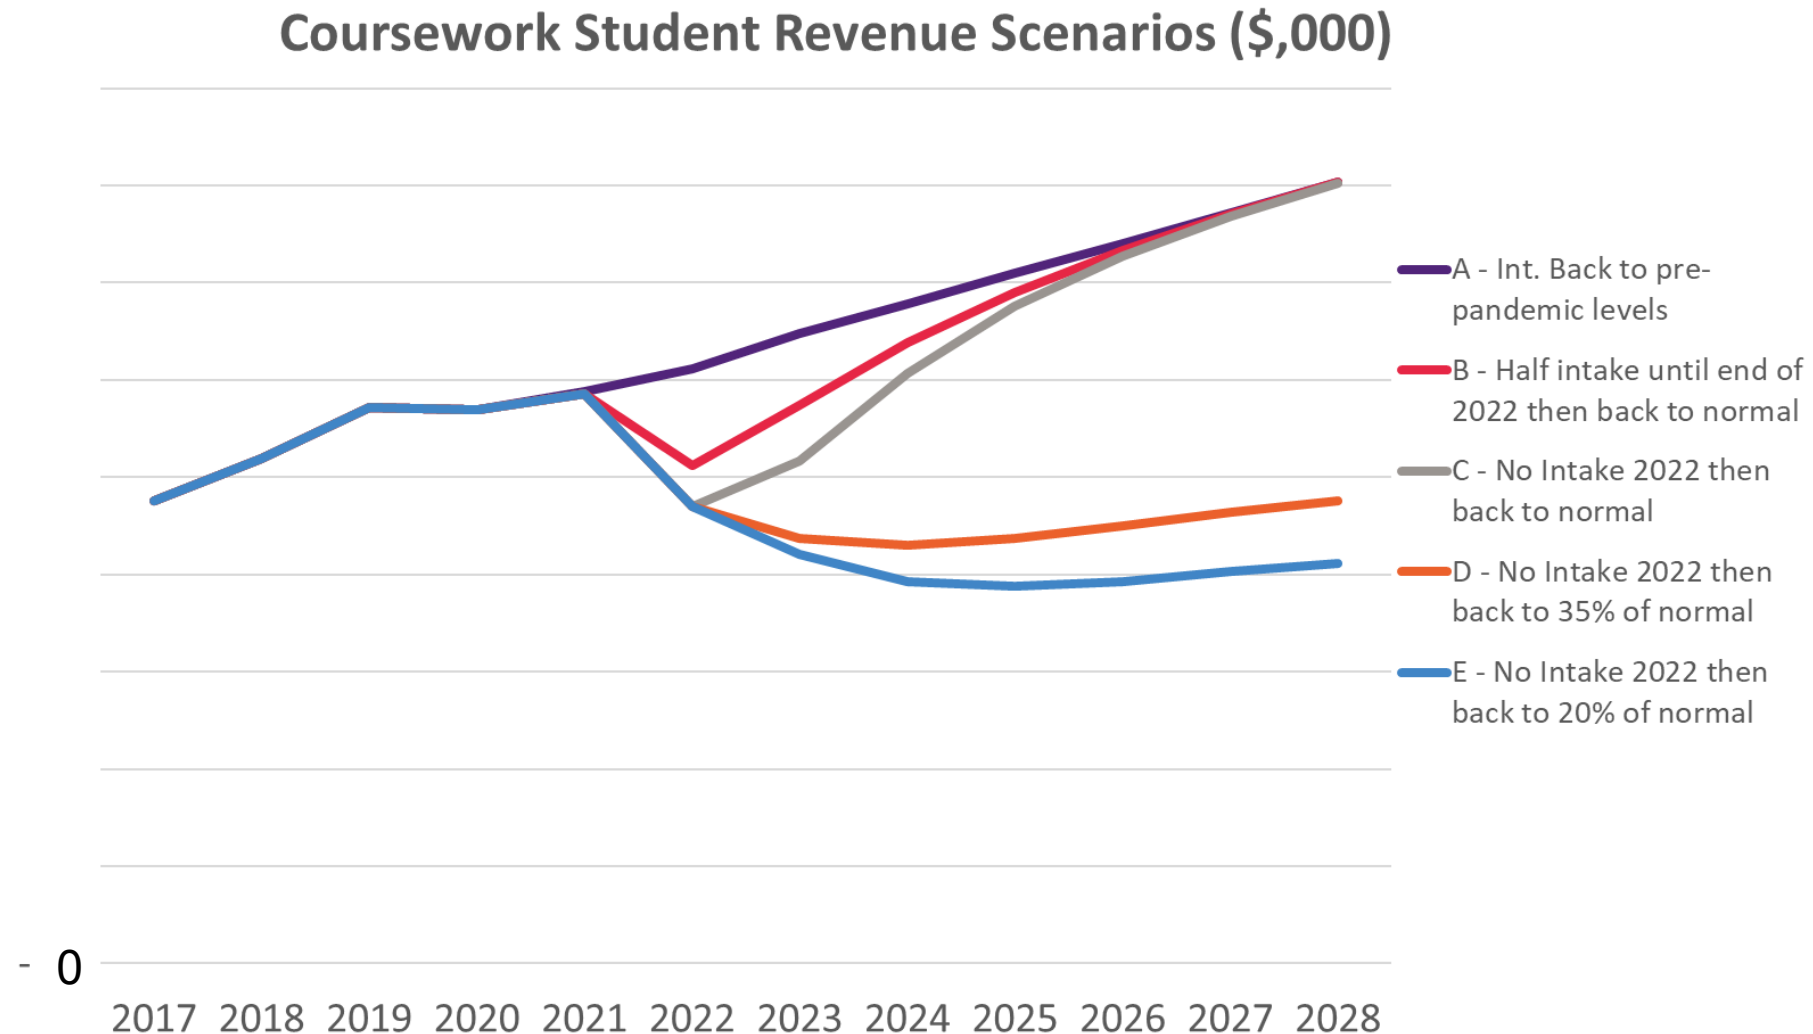

Even if international student intakes returned to normal in 2023 it will take a few years to recover

Coursework Student Revenue Scenarios (\$,000)

A global economic downturn and/or geopolitical tensions could have a significant long term impact on the international student market.

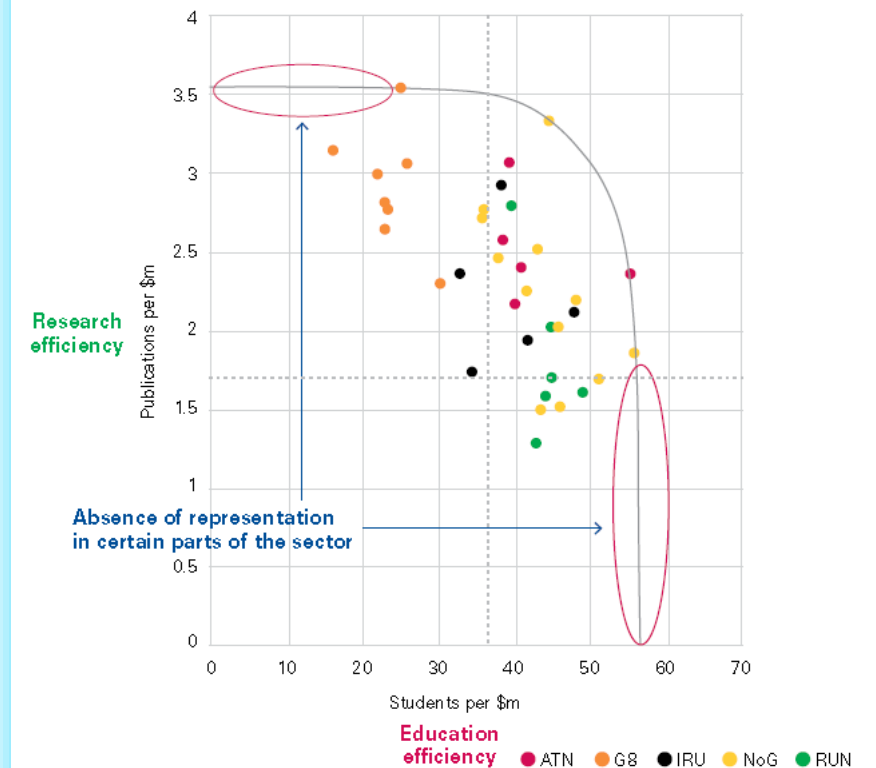

In the worst case scenario, what would uni0 look like if our coursework revenue was halved?

Are we well situated in a post-covid world?
