

WIL IN SCIENCE PLANNING WORKSHOPS

Growing WIL in Science is a national target endorsed by the ACDS and the Office of the Chief Scientist. It aligns to the broader agenda of the national WIL statement from Universities Australia and industry groups.

Starting from where you are, this workshop will help you to:

- plan your faculty approach to WIL
- review enablers: systems, people and resources
- develop new ideas with Lighthouse projects

LIGHTHOUSE PROJECTS

The Lighthouse projects are action-learning projects designed to establish visible organisation and leadership for work-integrated learning in science-based faculties and to generate peer-to-peer learning.

The Lighthouse projects form part of the ACDS WIL in Science national project.
